

---

## EMPLOYMENT

---

<b>DevOps Instructor</b>	<b>DCI Resources, LLC</b>	<b>Sep 2018 – Present</b>
--------------------------	---------------------------	---------------------------

- Taught Git workflows for version control (Source Code Management)
- Instructed how to Develop and maintain automated CI/CD pipelines for code deployment using Jenkins.
- Demonstrated provisioning of servers and deployment of features with Puppet and Ansible.
- Built and deployed Docker containers for implementing Microservice Architecture from Monolithic Architecture.
- Instructed on the Orchestration of Docker container cluster using Kubernetes.

<b>Senior System Administrator</b>	<b>University of New Haven</b>	<b>Jan 2017 – May 2018</b>
------------------------------------	--------------------------------	----------------------------

- Continuous software development in Django web server and bug fixes using Python in the back end of STAT.
- Managed Openfire server and Spark client for internal communication.
- Migrated from Openfire XMPP client to Slack-esque Rocketchat for improved inter-department communication.

<b>Research Assistant</b>	<b>University of New Haven</b>	<b>May 2017 – Jul 2017</b>
---------------------------	--------------------------------	----------------------------

- Executed shell scripts to batch process the data using Mapper and Reducer in Hadoop.
- Created a Machine Learning model using Linear regression to set a trend line for each processed data.
- Plotted charts for the occurrence of each type of storm in R Studio and Spyder using R and Python.

<b>Cloud Engineer</b>	<b>Vodafone Group plc</b>	<b>Feb 2014 – Aug 2016</b>
-----------------------	---------------------------	----------------------------

Cloud Operations Engineer & Data Protection Engineer

- Participated on planning, implementation, and growth of our infrastructure on AWS.
- Managed private cloud hosted on the VMware ESXi servers using vSphere web client.
- Worked in a huge backup environment consisting of 100+ backup servers and 15,000 client serves.
- Created Incremental (Level 1), Full and Archive Log backup policies for Oracle database using RMAN.
- Created Full, Incremental and Differential backup policies for Windows, UNIX and Linux client servers.

<b>Linux Administrator</b>	<b>Mphasis</b>	<b>Jun 2013 – Jan 2014</b>
----------------------------	----------------	----------------------------

- Managed Red Hat Linux and VMware ESX servers.
- Consistently maintained 98% uptime by monitoring with Splunk services.
- Deployed Puppet agent, Puppet Dashboard, and Puppet DB for configuration management.

---

## EDUCATION

---

<b>West Haven, CT</b>	<b>University of New Haven</b>	<b>Aug 2016 – Dec 2018</b>
-----------------------	--------------------------------	----------------------------

*M.S. in Computer Science, Dec 2018. GPA: 3.8*

- Graduate Coursework: Advanced Database Systems; Artificial Intelligence; Cloud Computing; Script Programming/Python; Distributed Database Systems; Intro to Computer Security.

<b>Pune, MH, IN</b>	<b>Vishwakarma Institute of Technology</b>	<b>Jul 2009 – May 2013</b>
---------------------	--	----------------------------

*B.Tech. in Electronics and Telecommunication, May 2013. GPA: 3.5*

- Undergraduate Coursework: Data Structures and Algorithms; Signals and Systems; Network Analysis and Synthesis; Digital Electronics and Microprocessors; Coding and Data Compression; Wireless Sensor Networks.

---

## SOFTWARE PROJECTS

**G I T H U B :** <https://github.com/faisalkhan91>

- **Dictionary Application:** A GUI based dictionary application that displays information sourced from oxford dictionary API, uses tkinter, coded in python.
- **NYC Bus Analysis:** Analysis of school bus breakdowns and delays using pandas, NumPy and matplotlib libraries to extract meaningful information.

---

## ADDITIONAL EXPERIENCE AND AWARDS AND HONORS

- **Tutor (2017 – 2018):** Taught computer science courses such as C/C++/Python Programming, Data Structures.
- **Outstanding Administrative Staff Award, Center for Learning Resources:** Exceptional performance award.
- **Member of Upsilon Pi Epsilon International Honor Society** (Since May 2018).

---

## LANGUAGES AND TECHNOLOGIES

- C, C++, SQL, Python, R, HTML, CSS, JavaScript, UNIX Shell Scripting (ksh/bash), Linux.
- VMware vSphere, AWS, Docker, Puppet, Chef, Ansible, Selenium, Docker, Docker Hub, Jenkins.
